# ABOUT US

As a tech expert or service provider, you want to use your skills and expertise to help companies with their tech. Finding new projects and acquiring new customers is a necessary evil, right?!

You spend a lot of time and money attending network events, or on other ways to attract attention.

What if you can find projects and customers easier at a far lower cost? Similar to the way hotels and restaurants do via websites that we're familiar with in our consumer life?.

By registering as a Tech Expert on TechnologyCatalogue.com, you can attract more highly qualified leads because your expertise is visible to potential customers in the energy sector. Particularly your expertise to select the right technologies and to get the technologies sustainably embedded.

Next to your FREE tech expert page, we offer additional services to help you gain extra exposure and build meaningful relationships with key players in the industry.

# WHY TECHNOLOGYCATALOGUE.COM?

An intuitive platform that enables you to search, share, review technologies and see in which areas a technology has been deployed.

Additional services to enable you to showcase your expertise and become a thought leader in the industry.

Find projects and acquire new customers. And help them make technology deployment happen and deliver value to their company.

Interact with both suppliers and end-users in multiple sectors, including Energy, Petrochemicals and Ports and Maritime.

# FREE Tech Expert Page

- Listed as 'Tech Expert' on TechnologyCatalogue.com
- A unique page with company introduction to highlight your in-house expertise
- Add your company logo and description
- Display virtual business cards of your technical experts (max. 2 experts for free; additional experts can be added against a fee of €500/expert/year)
- Be visible next to technologies within your field of expertise
- Display a list of technologies from TechnologyCatalogue.com with written reviews from your experts
- Add Logos of your clients
- Invite clients to leave reviews
- Contact form: Get questions from interested parties directly via your page

### Scope optimisation for Turnarounds

#### Deployment partner

Development and implementation of Minimum Intervention Strategy for Inspection (MISI) has resulted in cost reductions for shutdown related inspection work of up to 50%. The MISI concept was launched at the API Inspection Summit in Galveston USA in January 2015 and has been very successfully applied in many installations since.

MISI-Consultancy can deliver a review of your existing maintenance & inspection strategy with a focus on data quality, the status of Risk Based Maintenance analysis and the specification of an optimised maintenance & inspection scope.

Although developed for the Oil and Gas industry the concept and principles can easily be applied for other industries as well.

MISI-Consultancy can execute these activities for you and guide the implementation. We collaborate with reputable companies in non-destructive testing, robotic applications and inspection data analytics.

#### Our expertise

- ✓ **Inspection:** RBI & Minimum Intervention Strategy for Inspection
- ✓ **Inspection Strategy 4.0:** Reach up to 50% cost reductions for your turn arounds
- ✓ **Maintenance optimisation:** Application of Reliability Centered Maintenance strategies

#### Countries where we can support you

### About MISI-Consultancy

[VISIT WEBSITE](#)

#### MISI-Consultancy

MISI-Consultancy delivers services for improvement of Maintenance- and Inspection strategies with a specific focus on MISI, a Minimum Intervention Strategy for Inspection.

The objective of MISI is change of the inspection scope from intrusive to non-intrusive by applying advanced non-destructive examination. The remaining intrusive scope is optimized by using robotic technologies and LEAN principles.

A black Eames-style chair is positioned in the lower-left corner of the frame. Resting on the chair's seat is a white rectangular sign with the words "THINK OUTSIDE THE BOX" in a bold, black, sans-serif font, arranged in three lines. The background is a soft-focus indoor setting with a light-colored wall and some dark, leafy branches visible in the upper left.

# Premium Services

Next to the FREE account, we offer additional services to help you showcase your expertise. This includes:

- Sponsored Content to showcase your Expertise
- Analytics Dashboard to Track your Page Visitors and More!
